Description

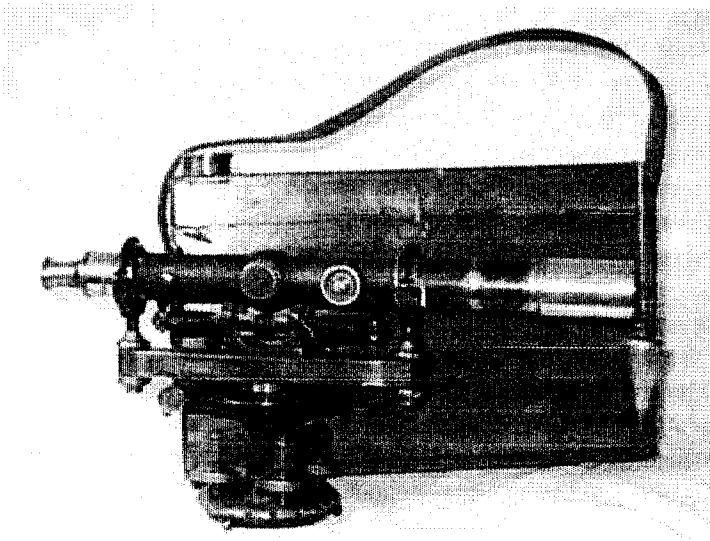

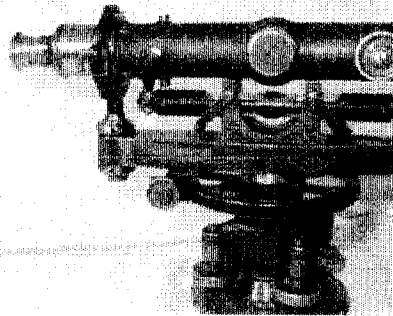

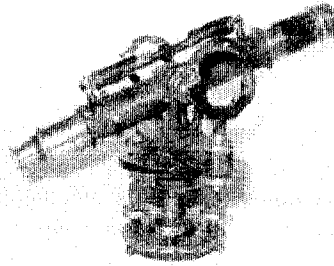

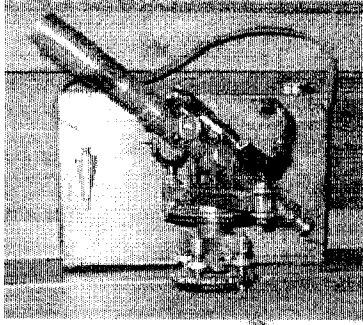

~EXCEPTIONAL KUKER RANKEN ENGINEER'S LEVEL~

KUKER RANKEN INC., SEATTLE WASH. 11849 is stamped on the right side of the mounting bar. Level is complete with sunshade and cap, 3" brass plumb bob, and dove tailed wooden carrying case. The level measures 12" long without the sunshade (15 ¼ inches extended with sunshade). The level measures 7 ½ inches from base to top of scope. The diameter of the lens is 1 ¼ inches. A 1 inch knurled brass knob adjusts the length of the tube by 1 ¼ inches. Lens and cross hairs are in excellent condition. The adjustable eyepiece has a built in cover that can be opened and closed. The removable scope is held onto the leveling base by two wye mounts with lever locking devices. The under scope level tube measures 6 inches in length and is intact and in working condition. The scope has an unusual feature that allows the scope to be mounted in a special bracket at 90 degrees to its normal position (see picture) In this position the level can be used to shoot a vertical line.

The 4 inch compass has excellent marking. A ¾ inch knurled brass locking nut and ¾ inch fine tuning nut are used to make adjustment to the compass. All leveling adjustment knobs are in excellent working condition. The mounting thread for the tripod measures 2 ¾ inch (inside measurement). We do not have the tripod. The plumb bob attachment is intact.

The instrument retains approximately 85% of original finish with minor brassing in the usual locations. This is great opportunity to acquire a fine precision instrument for your collection. Satisfaction 100% guaranteed. If not satisfied buyer to pay return shipping.

take 7 -10 days to clear. *Thank you* for your interest. **Good Luck Bidding.**
