

TO CORRESPONDENTS

This catalogue and price list supersedes all former editions.

The prices in this catalogue are net cash, and instruments are not sold on the installment plan.

Every instrument is carefully packed, and the responsibility of the house ceases when instruments leave the factory. In case of damage, the express companies must be held liable.

Instruments are not sent on trial but will be sent C. O. D. for purposes of examination.

Goods sent C. O. D. only when order is accompanied by a deposit sufficient to pay expressage both ways.

The engravings in this catalogue give a good idea of the instruments at the present time; as improvements however, are being constantly made, customers will always receive the latest improved instruments.

My aluminum instruments weigh from 40 to 50% less than the regular ones, and the price is 15% higher.

Weight of regular instruments are as follows:

Transits, No.....	1	2	3	4	5	6	7
	14½ lbs.	15	16	17	11	10	17½
Tripods.....	8½	8½	8½	8½	7	7	8½
Levels	8 lbs.	9	10	11			
	15	12½	10	8			
Tripods.....	8½	8½	8¼	8			

Any extras to transits and levels supplied at the lowest rates.

The illustrations of transits, levels and other surveying instruments in this catalogue, represent instruments made exclusively in my shop.

Standard astronomical instruments and other instruments not illustrated in this catalogue, are kept in stock and can be furnished upon application. Having made arrangements with foreign makers of such instruments, I can supply them upon the most reasonable terms.
